ABOUT ME

Software Engineer with expertise in PHP, Laravel, JavaScript, React, Vue.js, Python, and MySQL, specializing in scalable web applications and enterprise software solutions. Experienced in leveraging AI-powered development tools, automation, and modern engineering practices to deliver efficient, reliable, and business-focused software.

WORK EXPERIENCE

Ambala IT – Dhaka, Bangladesh

Address: House-67, Block-ka Pisciculture Housing Society, 1207 Dhaka (Bangladesh)

Software Engineer

[01/07/2024 – Current]

- Developed and maintained ERP applications focused on Accounting and Human Resource Management (HRM) modules, including financial workflows, reporting, payroll, and employee management.
- Customized enterprise software solutions to meet client-specific business requirements and improve operational efficiency.
- Played a key role in the development and maintenance of the YKK GA & Legal System.
- Developed and supported attendance device integration solutions to streamline attendance management and reduce manual processing.
- Delivered ongoing enhancements, bug fixes, and technical support for existing applications, ensuring system stability and continuous improvement.
- Collaborated with cross-functional teams throughout the software development lifecycle, from requirements analysis to deployment and support.
- Leveraged AI-assisted development tools and modern engineering practices to enhance development efficiency and software quality.

Nano Information Technology (Nanosoft) – Dhaka, Bangladesh

Address: CHA 75/C SM Bhaban, Pragati Sarani, 1212 Dhaka (Bangladesh)

Full-Stack Web Developer

[01/03/2023 – 30/06/2024]

- Developed and maintained web applications using Laravel and PHP, delivering scalable and user-focused solutions.
- Built interactive and responsive user interfaces using JavaScript, React.js, AJAX, HTML, and CSS.
- Collaborated with cross-functional teams throughout the software development lifecycle, from requirements gathering to deployment.
- Designed, optimized, and maintained MySQL databases to ensure data integrity and application performance.
- Performed application maintenance, bug fixing, feature enhancements, and performance optimization.
- Utilized Git for version control, code management, and effective team collaboration.

One Sky Communications Limited – Dhaka, Bangladesh

Address: 115/23 Motijheel Circular Road (6th Floor), 1222 Dhaka (Bangladesh)

Executive - Support Engineer

[01/09/2022 – 28/02/2023]

- Provide technical support (ISP infrastructure, router, switch) at the user end as per requirement.
- Coordinate with the network operation team to ensure the rollout plan and service delivery.

PROJECTS

[01/03/2026 – Current]

YKK GA & Legal

- Played a key role in the development and maintenance of YKK's General Affairs and Legal Management System.
- Developed key modules covering vehicle, visa, air ticket, apartment, hotel, and office administration management.
- Built dashboards, reports, and workflow automation solutions to improve business operations and efficiency.

[01/07/2024 – Current]

ERP Application (MicrofinPlus)

- Contributed to the development and enhancement of a comprehensive ERP solution covering Accounting, Human Resource Management (HRM), Payroll, and business operations.
- Customized ERP functionalities based on business requirements and contributed to process optimization, system maintenance, and continuous improvements.

[01/06/2025 – Current]

MOMO EMI

- Contributed to the development of a Mobile Money-based EMI platform that enables customers to purchase mobile devices through cardless installment facilities.
- Developed Product EMI Configuration and Offer Management modules, implementing business rules and workflows to support flexible financing options and promotional campaigns.

[03/09/2023 – 30/06/2024]

Special Branch (Bangladesh) Inventory Management System

- Played a key role in the successful development and management of an inventory system designed to optimize stock product management, requisition creation, and product distribution.
- Creating a variety of reports, including requisition details, current stock reports, and expired product reports, provides critical insights into inventory management.
- Designing role-wise dashboards, using AmChart to visualize and display key metrics such as the most requisitioned products list and the most stocked products list, enabling data-driven decision-making.

[01/04/2023 – 30/06/2024]

UNHCR IWMS (Inventory and Warehouse Management System)

- Significantly contributed to UNHCR's inventory and warehouse management project, developing various reports such as warehouse-wise and distribution point-wise goods reports, beneficiary reports, and current stock reports.
- Collaborated with the project team to ensure the system met UNHCR's unique requirements for inventory and warehouse management.

[10/03/2023 – 30/09/2023]

BUP (Bangladesh University of Professionals) Educational Website

- Contributed to the development and design of the BUP educational website, actively involved in creating and maintaining various pages for both the frontend and backend.
- Designed and developed key pages for BUP clubs, gallery, news, events, and notices, enhancing the website's functionality and user experience.

[01/12/2023 – 30/06/2024]

BRAC SELP (Social Empowerment and Legal Protection)

- Significantly contributed to the development of a robust Legal Aid platform, emphasizing court cases, Alternative Dispute Resolution (ADR), and legal assistance, with a specific focus on preventing child marriages
- Established "Swapnosarothi," a girl's agency, organizing brigades, imparting life skills, and generating impactful reports.
- Implemented a strong data system for survivor-wise direct service and legal protection reports, enhancing decision-making.

[01/01/2021 – 20/12/2021]

Fastway - A Web Based Courier Service

- Leveraging raw PHP, JavaScript, AJAX, OOP principles, HTML, CSS, and jQuery.
- Fastway offers a comprehensive solution for individuals and businesses seeking efficient logistics management.
